05 Recording attendance
06 Reporting & exports
07 How commission is worked out
08 Everyday tips & help

1 Signing in & getting around

Open the app in your browser and sign in with the email and password your administrator gave you. Your account is tied to one dive centre, shown in the top bar. Everything you see and do stays within that centre, and the centre switcher is disabled for your account.

1. Go to the app address and enter your **email** and **password**.
2. You land on **Home**. The top bar carries your account and Sign out; the menu below it has `Home` `New Bill` `Bills` `Presence` `Reporting`.
3. At the right of the top bar are your name and role, a light/dark theme toggle, and **Sign out**.

> **NOTE** Passwords are set by your administrator — there is no self-service reset. If you are locked out, or your account is switched off, ask your administrator. For security, five wrong passwords in a row temporarily locks sign-in for that account, even with the correct password; wait a few minutes and try again.

2 Home dashboard

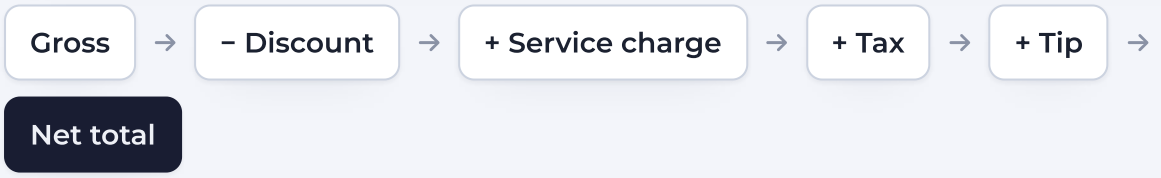

Home shows the current month and the current day: the day's revenue, a daily-turnover chart you can switch between line and bars, and running totals. It is read-only and updates as bills are saved.

3 Writing a bill

New Bill has two halves: the item catalogue on the left, and the bill you are building on the right. Totals update as you add lines.

Build the bill

1. Find items with the **search box** or the **category chips**. Click an item to add it as a line.
2. On each line, set the **quantity** and a **discount** if one applies. The price comes from the catalogue and shows in the Price column.
3. Enter the guest details: **Room number**, **Guest name**, **Departure date**, **Nationality**, and any **Tip**. Type these in; there is no hotel-system feed.
4. Check the running totals on the right: **Gross → Discount → Service charge → Tax → Tip → Net**.
5. Click **Save bill** and confirm. The check number is filled in for you; see below.

Bill numbers

The check number is shown at the top of the screen. It is filled in for you and continues from the last bill you saved. To match the Micros check, change it with the **+ / −** stepper or by typing over it before you save. Numbers are unique to your centre: if you enter one a current bill already uses, the app stops the save and tells you. Deleting a bill releases its number, so you can post that number again.

Personal commission on a line

Some items pay a fixed amount to a specific staff member, such as a photographer or the person who sold a course. When you add one, a **staff picker** appears for each paid role (seller,

guide, instructor, photo, video). Choose who did what, and that person is credited for the line. If no picker appears, the item has no personal commission.

> **NOTE** If a bill already exists for that room today, typing the room number offers to fill in the guest details from it. Useful for a guest's second visit the same day.

> **IMPORTANT** Service charge is a charge on the guest's bill. It is not paid to staff and is never part of commission.

4 Finding & fixing bills

The **Bills** screen lists your centre's bills. Narrow the list with the date range and the search box, then open any bill to see its detail. From a bill you can:

ACTION	WHAT IT DOES
Re-date	Move a bill to a different business date (the number stays the same).
Rebate	Reverse a bill with a linked adjustment. The original stays on record; a rebated bill earns no commission.
Delete	Soft delete. The bill is removed from totals but kept in history, and its number is released so you can reuse it.

> **NOTE** Use **Re-date** or **Rebate** to correct a bill where you can; they keep the clearest trail. All three actions are written to the administrator's change log.

5 Recording attendance

Presence is the daily attendance register, and it drives commission. Record it each day. Only dive-centre staff appear here; reception and other non-diving roles are not listed.

1. Pick the day on the calendar (it opens on today).
2. For each staff member choose a status from the dropdown, or hit **All present** to set everyone at once and then change the few who differ.
3. Click **Save**. The day's dot turns solid and the calendar updates.

What the statuses mean for commission

STATUS	COUNTS TOWARD COMMISSION THAT DAY?
Present	Yes
Off / Off (half day)	Yes — counted in full
Annual leave, Sick, Absent, Emergency / Unpaid leave	No — excluded from the day's pools

Reading the calendar colours

Each day is coloured by how complete its record is, judged against the staff who were actually employed *that* day:

- **Recorded** — everyone employed that day is marked.
- **Partial** — some, but not all, are marked.
- **Missing** — a past day with nothing recorded. The “N days missing this month” counter tallies these.

> **NOTE** Staff appear from their **hire date** and drop off after their **leaving date**. Days before someone joined are not counted, so an early-month day can read as complete with only the staff employed then marked.

6 Reporting & exports

Reporting turns your bills and attendance into figures. Set the **dashboard date range** at the top and everything below follows it.

What you'll see

- Headline numbers: turnover, service charge, tax, bill count, average bill, and total commission.
- Charts: revenue by category, by nationality, top items, by weekday, and daily trends.
- **Commission by staff** — broken into Course, Dive, Override, Tips and Personal.
- A “who did what” personal-commission table.

Exports

- **Daily report** — pick a date, download the day's `.xlsx`.
- **Monthly report** — pick a month (independent of the dashboard range) and download the full workbook.
- Each chart has its own small **Excel** download for just that data.

Recompute & locked months

Commission recalculates automatically whenever bills, attendance or rules change. The **Recompute commission** button forces a recalculation if you want to confirm the figures. A **Locked** pill on a month means your administrator has frozen it for payroll: the figures will not change, and Recompute is disabled until they unlock it.

7 How commission is worked out

The app calculates all of this. Knowing how it works makes the Reporting figures easier to read. Commission comes from up to five channels:

CHANNEL	WHO GETS IT
Course pool	Shared equally among the *sharing* positions who were present that day (e.g. Base Leader, Assistant Base Leader, Instructor).
Dive pool	Shared equally among *all* dive staff present that day.
Base-leader override	An extra 10% of the pool, paid to the base leader(s) — regardless of attendance.
Tips	Split equally among the staff you picked on the bill.
Personal	The fixed per-line amount, to the staff you picked for each role on the bill.

IMPORTANT Only dive staff marked present share the Course and Dive pools; leave and sick days are excluded. Keeping Presence current is what keeps pay correct.

8 Everyday tips & help

- **Record attendance daily.** It has the largest effect on whether commission comes out correct.
- **Check the bill number** against the Micros check before saving.
- **Switch light or dark** with the theme toggle at the top right.
- **Your centre is fixed.** Changing it is an administrator task.

NOTE To check a figure on Reporting, open **Bills** for the same date range and review the underlying bills. The two reconcile.
